## Retail Management Consultants (known as RMC)

RMC services the Retail and Hospitality Industries at large, with a specific focus on the Voluntary Trading and Franchise areas.

The team provides a comprehensive Management Consulting service, specialising in operational systems and financial controls, to ensure that their clients are always in the position to make critical management decisions timeously, based on the accurately provided information.

In addition, the company focuses on the set-up of new ventures through the critical first year of trade. Its success is dramatically illustrated by the fact that the Voluntary Trading Group responsible for probably the highest turnover in this sector has retained RMC's services for all new stores in their first three months of trading and has granted the company exclusive supplier status.

Besides its professional accounting staff, the company enjoys the services of highly experienced operational and financial consultants.
